***Allowable Subject Matter***

1. Claims 15-20, 33-37, 39-43 and 45-50 (now renumbered 1-22) are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Regarding independent claim 20, the German article "Wie geschmiert", cited on applicant's IDS of July 17, 2009, supports the patentable distinction of the limitation "a) bumpers carried by one of the drive arm and the base plate composed of a polyethylene having a molecular weight of 3 to 6 million". That range defines material comprised by ultrahigh molecular polyethylene that will exhibit good resistance to wear and good sliding properties.
4. The German office action, cited on applicant's IDS of July 17, 2009, also addresses the positive effects of using a polyethylene of an ultra high molecular weight for the purpose of damping or as a dampening material.
5. Fox '298, cited on applicant's IDS of July 17, 2009, is silent to the material used therein to form plastic or resilient actuation ring 28, resilient element 80 and flexible section 82.
6. Regarding independent claims 15 and 16, Fox '298 cannot meet the claimed limitation "damper engaging the linkage and isolated from contact with the shutter blades" or "a damping system on the base plate engaging the linkage, isolated from contact with the shutter blades". As shown in Figure 2 of Fox '298, for example, flexible section 82, resilient element 80, actuation ring 28, and drive pin 42 are integrally formed and drive pins 42 contact the shutters. The dampening effect provided by element 80 and ring 28 cannot meet the limitation

Art Unit: 2862

"isolated from contact with the shutter blades" because of the structural orientation of the drive pins. In addition to the structure shown in Figure 2, it is not clear that separator plate 22 provides a complete separation between portions or extensions of actuation ring 28 and the shutter blades 14, 16 and 18. Again, the limitation directed to isolation cannot be met by the teaching.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
